Joint FedKLS: discarded KL on each run's own evolving posteriors
A. Upload-window sweep | Bmax = 1 MHz
Reference (1 MHz, U=58.97 s)
U = 48.97 s
U = 38.97 s
U = 28.97 s
Weighted discarded KL (log scale)
FL communication round (R2–R150)
B. Bandwidth sweep | U = 58.973 s
Reference (1 MHz, U=58.97 s)
B = 0.55 MHz
B = 0.75 MHz
B = 0.95 MHz
Weighted discarded KL (log scale)
FL communication round (R2–R150)
R1 excluded: initial precision scoring floor creates a very large outlier. Curves are NOT same-posterior comparisons.
